

HERO™ BIOBASED KITCHEN CLEANER

**A Renewable Product that Boosts Your Sustainability
62% Biobased, Readily Biodegradable**

Kitchens

Fryers

Floors

Dishes

Pots & Pans

- ▶ **KITCHENS:** Versatile, use on grills, tables, ovens, exhaust hoods, and food preparation surfaces to name a few. Makes easy work of cleaning fryers. Leaves the kitchen gleaming and smelling fresh and pleasant.
- ▶ **FLOORS:** For manual mopping of all types of floors. Leaves floors spotless with no film.
- ▶ **DISHES, POTS & PANS:** Manual washing of dishes and pots & pans. Cleaning power lasts long as Hero moves the grease & grime out of the way.
- ▶ **HERO™** is non-toxic, not an skin irritant, **62% BIOBASED** and **READILY BIODEGRADABLE**. **HERO™** exceeds the mandated **USDA BIO-PREFERRED** biobased specifications.
- ▶ **PLANT-BASED, NON-PETROLEUM, NON-TOXIC FORMULAS:** Study after study point to toxicity of petroleum exposure primarily from inhalation as one of the largest worker health concerns. Data gathered from the tragic Gulf of Mexico and Valdez spills confirm that the primary cause of wildlife death has been petroleum inhalation. Concern is rising that clean-up workers may be more at risk for long-term health issues due to petroleum exposure. Many cleaning products use petroleum derivatives that put not only your maintenance staff but also every one in the building at risk. Solvents and cleaning products cause indoor air pollution that impacts the health of everyone. Eliminate petroleum health risks now with **HERO™**.
- ▶ **HERO™** is the "**PERFECT GREEN SOLUTION**". Its unique formulation is produced from "**UPCYCLED**" post consumer vegetable oil. Where some see a waste, we see a quality product. It is easy to be **GREEN** with **HERO™**.
- ▶ "**UPCYCLING**" is **MORE** than recycling; it turns a used product into a **HIGHER VALUE** resource rather than one of equal or lower value. It is a **SMARTER WAY TO MANUFACTURE** bio-soaps and bio-solvents, saving material, saving water, saving energy, and saving the Earth.
- ▶ **AWARD WINNING INNOVATION:** For over 25 years Solvent Systems International has been helping business to implement **STATE-OF-THE-ART** pollution prevention technologies and solutions that **SAVE MONEY** and **SAVE THE ENVIRONMENT**. We received the IL Governor's Award for Pollution Prevention twice and a Chicago Innovation Award for Design for our work.

INNOVATIVE RENEWAL TECHNOLOGY

BE A HERO, LEAVE A LEGACY THAT MAKES OUR WORLD BETTER
