Subject: Parts Washer

Dear Waste Management Research Center,

This parts washer unit that we tested was by far the best of them all!

Our automotive mechanics plus the garage attendants in our shop used it for everything. It cleans up greasy bearings "so well" that the mechanics do not have to shake or hand-spin the bearings to get all of the grease out. Grimy, oil-soaked gas & diesel engine parts took very little effort to clean.

We have not had any mechanical problems nor have we required any adjustments. Solids are separated easily making them convenient to remove. This water-based unit is definitely a state-of-the-art machine.

We have no complaints about the smell or feel & this unit would certainly be the one that I would purchase for our automotive mechanics & garage attendants to use in our shop.

Sincerely,

Craig Wilson
